The latest arriving date is in each course a day before the course starts, the earliest departure date for each course is the day after the course ends.

Course: In the area of conflict “Homeland” and “Outland” artists have been searching for new inspirations for their artistic creations, because the perception widens with the imprints of new surroundings, far away from the daily round and stress, helping them to get to new imagination and creative ideas. In class we'll concentrate on the design of a artistic idea, where the delight for the new surroundings should be used as a source for inspiration.

The island Lanzarote offers an optimal background for work of arts about travel, “The Foreign and Me”. A lot of tourists visit the island all over the year and explore the landscape. Everyone perceives it differently and takes different experiences and adventures back home.
