

scoli.ecomunitate.ro is a framework for European schools to collaborate on the Internet with partner schools from Romania

Here you can find over 400 schools, from different Romanian regions and with different backgrounds that are interested in cooperating with colleagues from other European countries. The **twinning process** means that your school forms a special link with a school in another country, a link which can enrich education and development for both schools. The best way to twin is to use the Information and Communication Technologies (ICT), that is computers, information systems, Internet and their daily applications (such as email or instant messaging programs).

You can easily get involved in a **Twinning project with a Romanian school** without going through a complicated procedure. You must simply register your school, find a Romanian partner, and register your project through this website.

By starting a twinning project with a Romanian school you will be able to:

- meet pupils and teachers from Romanian schools
- learn about Romanian history, geography, culture, traditions, etc.
- develop a project with your Romanian partner
- practice your ICT skills
- share your knowledge and interests with your Romanian partner

Three Steps for Successful Twinning

1. Start by **registering your** school. Fill in the registration form where you are asked to give details about you, your school and your project idea. Please fill in all the fields so that you can be contacted by suitable partners.
2. To set up an Twinning partnership, you need to find a Romanian partner and define together the project idea. If you do not have a partner, you can search for one using „**search for a partner**” tool, available on the web site.
3. As soon as you find your partner, you can register your partnership by using the **Twinning agreement**. Use the **Action plan** - also available on the web site - to plan the project with your partner.

**There are no grants available for this programme,
and face-to-face meetings are not a requirement!**
